

CURRICULUM VITAE

Jing Ma, Ph.D.

PERSONAL DATA

- Fred Hutchinson Cancer Center, Seattle, WA
- Email: jingma@fredhutch.org
- Website: <https://drjingma.com/>
- ORCID: <https://orcid.org/0000-0001-6294-227X>

RESEARCH STATEMENT

My research develops statistical frameworks that turn complex multi-omic data into interpretable biological insights. Specifically, I study how compositionality, high dimensionality, latent structure, and population heterogeneity shape inference on molecular networks and pathways. My work is grounded in long-term collaborations in cancer biology, neuroscience and aging, ensuring that methodological advances are closely aligned with important scientific questions.

EDUCATION

- Ph.D. in Statistics, University of Michigan, Ann Arbor, MI. 2010–2015.
- B.S. in Mathematics, Fudan University, Shanghai, China. 2006–2010.
 - Graduated with University Distinction (Highest).

POSTGRADUATE TRAINING

- Postdoctoral Research Fellow, Department of Biostatistics and Epidemiology & Department of Statistics, University of Pennsylvania. 2015–2017.

FACULTY POSITIONS

Fred Hutchinson Cancer Center, Division of Public Health Sciences

- Assistant Professor, Biostatistics Program, 2017–2023
- Associate Professor, Biostatistics Program, 2023–present
- Affiliate faculty, Department of Biostatistics, University of Washington, 2019–present
- Co-Director, Fred Hutch Biostatistics Consulting and Collaboration Center, 2025–present

Texas A&M University, Department of Statistics

- Assistant Professor (tenure-track), 2019–2020

RESEARCH FUNDING

Major Grants as PI

- **2022–2027** – NIH R01 GM145772 (PI).
Statistical methods for network-based integrative analysis of microbiome data. Total costs: \$1,838,548.

Grants Under Review

- **2027–2032** – NIH R01, NIDDK (PI).
Novel integrative analysis methods for mapping host–microbiome interactions in diabetes. Total costs requested: \$2,807,135. Revision submitted July 2026.
- **2027–2032** – NIH R01, NICHD (Co-I; PI: Sasamoto N).
Gut microbiota and metabolome in endometriosis from adolescence to adulthood. Submitted June 2026.
- **2027–2032** – NIH R01, NHLBI (Co-I; PI: Markey K).
Microbiome-derived short-chain fatty acids as regulators of hematopoietic recovery and immune reconstitution after transplantation. Total costs requested: \$4,709,714. Submitted June 2026.
- **2027–2032** – NIH R01, NCI (Co-I; PI: Markey K).
A randomized phase II trial of plant-based whole foods during autologous stem cell transplantation. Total costs requested: \$4,340,362. Submitted Feb 2026.

Major Grants as Co-Investigator

- **2026–2030** – American Cancer Society Research Scholar Grant (Co-I; PI: Markey K).
Microbe-derived short-chain fatty acids regulate chronic GVHD by controlling B cell development. Total costs: \$946,000.
- **2025–2029** – NIH P30 CA015704 (Co-I; PI: Lynch T).
Cancer Center Support Grant Shared Resources Core. Total costs: \$2,315,185.
- **2023–2027** – NIH R01 GM151301 (Co-I; PI: Wu M).
Statistical methods for enhanced mapping of microbiome relationships. Total costs: \$1,222,242.
- **2020–2024** – NIH R01 GM133848 (Co-I; PI: Shojaie A).
Novel statistical inference for biomedical big data. Total costs (subaward): \$193,903.
- **2018–2023** – NIH U19 AG057377 (Co-I; PI: Promislow D; Data and Analysis Core Co-Lead).
The Dog Aging Project: the genetic and environmental determinants of healthy aging in companion dogs. Total costs (subaward): \$1,077,911.
- **2018–2022** – NIH R01 GM129512 (Co-I; PI: Wu M).
Joint analysis of microbiome and other genomic data types. Total costs: \$1,584,000.

Internal / Center Pilot Awards

- **2022–2024** – Fred Hutch Translational Data Science Integrated Research Center Pilot Award (Contact PI; MPI with Markey K).
Systems biology analysis of the immunomodulatory influence of circulating gut microbe-derived metabolites after transplantation. Total costs: \$100,000.
- **2021–2022** – Fred Hutch Pathogen-Associated Malignancies Integrated Research Center / Microbiome Research Initiative Pilot Award (PI).
Statistical methods for network-based analysis of the colorectal cancer microbiome. Total costs: \$75,000.

b) Journal Publications: Substantive Collaboration

14. Ueland KM, Elahi T, Rasmussen M, Wolfe AE, Purcell H, Chakka S, Mirimo-Martinez M, Persinger H, Peterson K, Boynton A, McMillen K, Byelykh M, Biernacki M, Yeh A, Ali N, Manjappa S, Wuliji N, Fredricks DN, Bleakley M, Holmberg LA, Schenk J, Raftery D, **Ma J**, Hill GR, Neu-houser ML, Lee SJ, Markey KA. Plant-based whole-food diets are feasible during autologous stem cell transplantation and are associated with dose-dependent microbiome modulation: Results from a pilot clinical trial. *Blood Advances*. 2026.
15. Hill CM, Malen RC, Reedy AM, Kahsai O, Ammar H, Curtis K, Ma N, Randolph TW, **Ma J**, Thomas CE, Ogino S, Potter JD, Buchanan DD, Newcomb PA, Hullar MAJ, Phipps AI. Associations of epidemiologic risk factors with *Fusobacterium nucleatum* and bacterial alpha diversity in the colorectal tumor-associated microbiota. *Cancer Causes & Control*. 37(3):45, 2026.
16. Phipps AI, Hill CM, Lin G, Malen RC, Reedy AM, Kahsai O, Ammar H, Curtis K, Ma N, Randolph TW, **Ma J**, Ogino S, Newcomb PA, and Hullar MAJ. *Fusobacterium nucleatum* enrichment in colorectal tumor tissue: Associations with tumor characteristics and survival outcomes. *Gastro Hep Advances*. 4(6):100644, 2025.
17. Vantaku V, Putluri V, Bader D, Maity S, **Ma J**, Sreekumar A and Putluri N. Epigenetic loss of AOX1 expression via EZH2 leads to metabolic deregulation in bladder cancer. *Oncogene*. 39:6265–6285, 2020.
18. von Rundstedt F, Kimal R, **Ma J**, Arnold J, Gohlke J, Putluri V, Krishnapuram R, Piyarathna D, Lotan Y, Godde D, Roth S, Storkel S, Levitt J, Michailidis G, Lerner S, Coarfa C, Sreekumar A, Putluri N. Integrated pathway analysis of a metabolic signature in bladder cancer – a linkage to The Cancer Genome Atlas project and prediction of survival. *Journal of Urology*. 195(6):1911–1919, 2016.

Selected Dog Aging Project Consortium publications (from more than 20 consortium papers, 2022–2026):

19. Mariner BL, McCoy BM, Greenier A, Brassington L, Slikas E, Adjangba C, Cheng C, Marye A, Harrison BR, Bamberger T, Algavi YM, Muller E, Harris A, Rout E, Reichel C, Sohrab V, Dog Aging Project Consortium (... , **Ma J**, ...), Karlsson EK, Akey JM, Avery A, Borenstein E, Promislow DEL, Snyder-Mackler N. Epigenomic signatures of lifespan variation in dogs: findings from the Dog Aging Project. *Science*. 2026.
20. Bamberger T, Muller E, Algavi YM, Greenier A, Adjangba C, Slikas E, Brassington L, Mariner BL, McCoy BM, Harrison BR, Partida-Aguilar M, Marye A, Harris A, Rout E, Dog Aging Project Consortium (... , **Ma J**, ...), Avery A, Promislow DEL, Snyder-Mackler N, Borenstein E. Mapping the canine microbiome: Insights from the Dog Aging Project. *Nature Communications*. 2026.
21. Coleman AE, Creevy KE, Anderson R, Reed MJ, Fajt VR, Aicher KM, ..., Kaerberlein M, and Dog Aging Project Consortium (... , **Ma J**, ...). Test of Rapamycin in Aging Dogs (TRIAD): study design and rationale for a prospective, parallel-group, double-masked, placebo-controlled, multicenter trial of rapamycin in healthy middle-aged dogs from the Dog Aging Project. *GeroScience*. 2025 Jun;47(3):2851–2877.

22. Prescott J, Keyser AJ, Litwin P, Dunbar MD, McClelland RL, Rupple A, ..., Dog Aging Project Consortium (...), **Ma J**, (...), Borenstein E, Snyder-Mackler N, Promislow DEL. Rationale and design of the Dog Aging Project precision cohort: a multi-omic resource for longitudinal research in geroscience. *GeroScience*. 2025 Aug;47(4):5725–5748.
23. Harrison BR, Partida-Aguilar M, Marye A, Djukovic D, Kauffman M, Dunbar MD, ..., Dog Aging Project Consortium (...), **Ma J**, (...), Avery A, Borenstein E, Snyder-Mackler N, Promislow DEL. Protein catabolites as blood-based biomarkers of aging physiology: Findings from the Dog Aging Project. *Aging Cell*. Sep 2025.
24. McGrath S, Hull E, Dunbar MD, Prescott J, Keyser AJ, MacLean EL, Darvas M, Latimer C, Moreno J, MacCoss MJ, Kauffman M, Dog Aging Project Consortium (...), **Ma J**, (...). The companion dog as a translational model for Alzheimer’s disease: Development of a longitudinal research platform and post mortem protocols. *Alzheimer’s & Dementia*. 2025 Sep;21(9):e70630.
25. Creevy KE, Akey JM, Kaeblerlein M, Promislow DEL, and Dog Aging Project Consortium (...), **Ma J**, (...). An open science study of ageing in companion dogs. *Nature*. 602:51–57, 2022.

c) Manuscripts under Revision

1. Guan W and **Ma J**. Network estimation and clustering with block-structured Gaussian graphical models. Under revision for *Journal of Computational and Graphical Statistics*. July 2026.
2. Wang Y, **Ma J**, and Shojaie A. Direct estimation of differential Granger causality between two high-dimensional time series. In preparation for *Journal of Machine Learning Research*. Sep 2026. <https://arxiv.org/abs/2109.07609>.

d) Manuscripts Submitted

1. Xu Z and **Ma J**. Bayesian covariance regression for differential network analysis of zero-inflated microbiome data. Submitted to *The Annals of Applied Statistics*. Mar 2026.
2. Wang Y, Randolph TW, Shojaie A, Hullar MAJ, Lampe JW, O’Keefe G, Walters K, Scherler K, and **Ma J**✉. Common latent factor regression for supervised multi-view data integration. Submitted to *Journal of the American Statistical Association: Applications and Case Studies*. Aug 2026.
3. **Ma J**, Hullar MAJ, Navarro SL, and Kundu P. Mediation analysis with compositional exposures. Submitted to *Biostatistics*. Sep 2026.
4. Kundu P and **Ma J**. Mediation analysis for irregularly sampled and sparse functional mediators via pooled regression. Submitted to *Journal of the American Statistical Association: Theory & Methodology*. Sep 2026.
5. Bairakdar MD, Dinesh D, Wang T, Burk R, Qi Q, Huttenhower C, Lipton RB, González HM, DeCarli C, Broce I, Tarraf W, Thyagarajan B, Gellman MD, Zhou H, Kaplan RC, **Ma J**✉, and Palacios N✉. Gut microbial variations associated with white matter hyperintensities in the Hispanic Community Health Study/Study of Latinos. Submitted to *Alzheimer’s & Dementia*. Sep 2026.
6. Mariner BL, McCoy BM, Greenier A, Brassington L, Slikas E, Adjangba C, Marye A, Harrison BR, Bamberger T, Algavi YM, Muller E, Harris A, Rout E, Dog Aging Project Consortium (...), **Ma J**, (...), Avery A, Borenstein E, Promislow DEL, Snyder-Mackler N. DNA methylation of transposons pattern aging differences across a diverse cohort of dogs from the Dog Aging Project. <https://doi.org/10.1101/2024.10.08.617286>.

e) Book Chapters

1. Li H and **Ma J**. Graphical models in genetics, genomics and metagenomics. In *Handbook of Graphical Models*. Editors: Mathias Drton, Steffen Lauritzen, Marloes Maathuis, Martin Wainwright. Chapman & Hall / CRC, 2018.
2. **Ma J**, Yue K and Shojaie A. Networks for compositional data. In *Statistical Analysis of Microbiome Data*. Editors: Subharup Guha, Somnath Datta. Springer, 2021.

f) Other Publications

1. **Ma J**. Estimation and Inference in High-Dimensional Gaussian Graphical Models with Structural Constraints. University of Michigan. 2015. [PhD Thesis]
2. **Ma J**, Xie P, Pantoja K, and Jones DE. Variable selection in balance regression with applications to microbiome compositional data. <https://arxiv.org/abs/2304.00143>. [Technical report]

PUBLISHED SOFTWARE

1. **BalExMed**: R package for mediation analysis with compositional exposures. On [GitHub](#).
2. **BloGG**: R code for network estimation and clustering of Gaussian graphical models. On [GitHub](#).
3. **CHIME**: Matlab code for clustering high-dimensional Gaussian mixtures with the EM algorithm. On [GitHub](#).

13. **TRECOR**: R code for Bayesian covariance regression with applications to analysis of microbiome data. On [GitHub](#).

ADVISING AND MENTORING

Postdoctoral Fellows

2018–2020 Yue Wang, PhD in Biostatistics, UNC Chapel Hill (joint with Ali Shojaie).

- First position:* Assistant Professor of Statistics at Arizona State University.
Current position: Assistant Professor of Biostatistics & Informatics at the University of Colorado Anschutz Medical Campus.
- 2021–2022 Ilias Moysidis, PhD in Statistics, Pennsylvania State University.
Current/First position: Researcher at Centre for Research & Technology - Hellas, Greece.
- 2025– Poorbita Kundu, PhD in Statistics, UC Davis.

Graduate Student RAs (project-based)

Mentored students on methodological and applied research projects as supervisor or co-mentor.

- 2017–2019 Kun Yue, UW Biostatistics PhD student, joint with Ali Shojaie.
Current position: Data and Applied Scientist at Microsoft.
- 2020–2022 Kristyn Pantoja, Texas A&M Statistics PhD student, joint with David Jones.
Current position: Principal Biostatistician at Novartis.
- 2022–2024 Xinyi Xie, UW Statistics MS student.
Current position: Software Engineer at Google.
- 2022–2025 Wenjie Guan, UW Statistics MS student.
Current position: PhD student in Statistics at Cornell University.
- 2023–2026 Zichun Xu, UW Biostatistics PhD student.
- 2024–2025 Paizhe Xie, UW Statistics MS student.
Current position: PhD student in Statistics at Washington University in St. Louis.
- 2024–2025 Bumjun Park, UW Biostatistics PhD student.
- 2024–2026 Mohamad Bairakdar, UW Biostatistics PhD student.
- 2026– Zhiyu Huang, UW Statistics MS student.

Undergraduate Students (project-based)

- 2021–2022 Lakshin Kumar, UW Biochemistry, joint with Daniel Promislow.
Current position: Medical student at UW.
- 2022–2024 Antoinette Fang, University of Chicago Mathematics.
Current position: PhD student in Biostatistics at UC Los Angeles.
- 2026 Keith Romero, summer intern from Bellevue College.

MS and PhD Committees in Non-Chair Role

- 2018–2019 Arjun Sondhi, UW Biostatistics PhD student (advisor: Ali Shojaie).
- 2022–2023 Pearl Liu, UW Biostatistics PhD student (advisor: Michael Wu).
- 2022–2023 Fang Nan, UW Biostatistics MS student (advisor: Chongzhi Di).

TEACHING

Courses Taught (Instructor)

- Statistics for Biology (STAT312), Texas A&M University — undergraduate; sole instructor; designed the course from scratch. Fall 2019.
 - Student evaluations (94% response, 17/18): rated 4.4/5 as instructor and 4.9/5 for treating students with respect.

Guest Lectures and Short Courses

- STAT/BIOST 111 Undergraduate Seminar Series, University of Washington. Spring 2024.
- Wellcome Genome Campus Course, “Genetic Analysis of Mendelian and Complex Disorders”. Summer 2022.

Graduate Teaching, University of Michigan (2010–2014)

- Instructor: Applied Qualifying Exam Bootcamp (Summers 2012–2014); Linear Algebra Bootcamp (Summers 2013–2014).
- Graduate Student Instructor: STAT600 Applied Statistics and Data Analysis (**GSI Excellence in Teaching Award**), STAT425 Introduction to Probability and Statistics, STAT601 Multivariate and Categorical Data Analysis.
- Lab Instructor: STAT250 Introduction to Statistics and Data Analysis.

PROFESSIONAL SERVICE

Editorial Roles

- Guest co-editor, *Frontiers in Oncology*. 05/2026.

Grant Review: NIH Study Sections and Panels

- NIH Maximizing Investigators’ Research Award (MIRA) study section (MRAG). 11/2026.
- NIH Analytics and Statistics for Population Research Panels A (ASPA) Study Section. 07/2025.
- NIH Special Emphasis Panel ZRG1. 03/2024.
- NIH Small Business: Computational, Modeling, and Biodata Management (MCST-14) Study Section. 03/2023.
- NIH Biodata Management and Analysis (BDMA) Study Section. 02/2022.

Professional-Society Committees

- Member, SLDS Conference Organizing Committee. 2026.
- Chair, ASA Section on Genomics and Genetics Student Paper Award Committee. 2024–2026.
- Member, WNAR Conference Organizing Committee. 2023.

Conference Reviewing and Student Paper Judging

- Judge, ASA Section on Genomics and Genetics Student Paper Competition. 2018–2020, 2023, 2024.
- Judge, ICSA Student Paper Competition. 2022.
- Reviewer, Conference on Neural Information Processing Systems (NeurIPS) and International Conference on Information Systems. 2016, 2018.

Journal Refereeing

- Reviewer for many leading statistics, biostatistics, and computational biology journals.

INSTITUTIONAL SERVICE

- Biostatistics PhD Admissions Committee, University of Washington. 2026.
- Faculty mentor, SeattleStatGROWS Summer Program, Fred Hutch. 2024, 2026.
- Faculty search committees, Fred Hutch. 2022–2026.
- Reviewer for internal pilot-award, seed-grant panels, trainee travel awards — Fred Hutch, UW, and Cancer Consortium. 2020–2026.
- Organizing committee, Biostatistics Program and Division of Public Health Sciences Faculty Retreats, Fred Hutch. 2022, 2024.
- Chair, Biostatistics Seminar Series, Fred Hutch. 2019.

INVITED TALKS AND SEMINARS

1. The Conference on Statistical Learning and Data Science, New York, NY. 11/2026
2. Joint Statistical Meetings, Boston, MA (Organizer: Rebecca Deek). 08/2026
3. International Chinese Statistical Association Conference, Shenzhen, China (Organizer: Zhigang Li). 06/2026
4. The Conference on Statistics in Genomics and Genetics (Invited Paper). 05/2026
5. The 19th International Joint Conference on Computational and Financial Econometrics (CFE) and Computational and Methodological Statistics (CMStatistics) (Organizer: Li-Xuan Qin). 12/2025
6. BIRS Workshop on “Novel Statistical Approaches for Studying Multi-omics Data”, Banff, Canada (Organizer: Jingjing Yang, Mingyao Li, Xiang Zhou, Sarah Gagliano Taliun, Christine Peterson, Tian Ge). 07/2025
7. Fred Hutch SeattleStatGROWS Scientific Talk, Seattle, WA. 07/2025
8. WNAR 2025 Meeting, Whistler, BC, Canada (Organizer: Yuan Jiang). 06/2025
9. Department of Biostatistics, University of Washington, Seattle, WA. 05/2025
10. The Conference on Statistical Learning and Data Science, Newport Beach, CA (Organizer: Ali Shojaie). 11/2024
11. Royal Statistical Society Conference, Brighton, UK. 09/2024
12. Fred Hutch SeattleStatGROWS Scientific Talk, Seattle, WA. 07/2024
13. International Chinese Statistical Association Applied Statistics Symposium, Nashville, TN (Organizer: Qian Wu). 06/2024
14. Fred Hutch Public Health Sciences All Staff Seminar, Seattle, WA. 04/2024
15. Joint Statistical Meetings, Toronto, Canada (Organizer: Huilin Li). 08/2023
16. International Chinese Statistical Association Applied Statistics Symposium, Ann Arbor, MI (Organizer: Wen Zhou). 06/2023
17. Fred Hutch Public Health Sciences Seminar, Seattle, WA. 06/2023
18. (Virtual) Fred Hutch Data of Cancer Research Seminar Series, Seattle, WA. 05/2023
19. (Virtual) Fred Hutch Microbiome Research Initiative Seminar Series, Seattle, WA. 04/2023

20. (Virtual) The 14th International Conference of the ERCIM WG on Computational and Methodological Statistics, London, UK (Organizer: Aaron Molstad). 12/2022
21. Mini-TED Talk at Fred Hutch Public Health Sciences Division Faculty Meeting, Seattle, WA. 10/2022
22. (Virtual) Fred Hutch-UW Rigor, Reproducibility and Transparency Seminar Series, Seattle, WA. 10/2022
23. (Virtual) Gut Origins of Latino Diabetes Monthly Meeting, Albert Einstein College of Medicine. 09/2022
24. (Virtual) International Chinese Statistical Association Conference (Organizer: Gen Li). 07/2022
25. (Virtual) IMSI Workshop – Multiscale Microbial Communities: Dynamical Models, Ecology, and One Health, Chicago, IL (Organizers: Hongzhe Li, Pamela Martinez, Shulei Wang). 02/2022
26. (Virtual) Fred Hutch Biostatistics Seminar Series, Seattle, WA. 11/2021
27. (Virtual) American Statistical Association Section of Statistics in Genomics and Genetics Webinars. 11/2021
28. (Virtual) Fred Hutch Translational Data Science Program Seminar Series, Seattle, WA. 03/2021
29. (Virtual) Gut Origins of Latino Diabetes Monthly Meeting, Albert Einstein College of Medicine. 01/2021
30. (Virtual) Hanash Lab Meeting, The University of Texas MD Anderson Cancer Center. 10/2020
31. (Virtual) Joint Statistical Meetings, Philadelphia, PA (Organizer: Sandipan Roy). 08/2020
32. The 12th International Conference of the ERCIM WG on Computational and Methodological Statistics, London, UK (Organizer: Aaron Molstad). 12/2019
33. (Virtual) The Dog Aging Project Science Seminar Series. 12/2019
34. University of Michigan 50th Anniversary Symposium, Ann Arbor, MI. 09/2019
35. International Chinese Statistical Association Conference, Tianjin, China (Organizer: Hongzhe Li). 07/2019
36. BIRS Workshop on “The Role of Genomics and Metagenomics in Human Health: Recent Developments in Statistical and Computational Methods”, Banff, Canada (Organizer: Hongzhe Li). 02/2019
37. The 11th International Conference of the ERCIM WG on Computational and Methodological Statistics, Pisa, Italy (Organizer: Yin Xia). 12/2018
38. Department of Statistics, Texas A&M University, College Station, TX. 11/2018
39. The 12th International Vilnius Conference on Probability Theory and Mathematical Statistics / 2018 IMS Annual Meeting on Probability and Statistics, Vilnius, Lithuania (Organizer: Hongzhe Li). 07/2018
40. Joint Statistical Meetings, Vancouver, Canada (Organizer: Ni Zhao). 07/2018
41. Data Science Innovation Lab: Mathematical Challenges of Single Cell Dynamics, Bend, OR. 06/2018
42. Fred Hutch Microbiome Symposium, Seattle, WA. 03/2018
43. Statistical Learning Applied to Biology Lab Seminar, Department of Biostatistics, University of Washington, Seattle, WA. 02/2018

44. Mini-TED Talk at Translational Research Program, Public Health Sciences Division, Fred Hutchinson Cancer Center, Seattle, WA. 02/2018
45. Department of Biostatistics, University of Washington, Seattle, WA. 01/2018
46. Department of Statistics, University of Florida, Gainesville, FL. 01/2018
47. Biostatistics Program, Public Health Sciences Division, Fred Hutchinson Cancer Research Center, Seattle, WA. 01/2018
48. International Chinese Statistical Association Applied Statistics Symposium, Chicago, IL. 06/2017
49. Biostatistics Program, Public Health Sciences Division, Fred Hutchinson Cancer Research Center, Seattle, WA. 02/2017
50. Department of Statistics, University of Warwick, Coventry, UK. 01/2017
51. (Virtual) Department of Mathematics and Statistics, Lancaster University, Lancaster, UK. 10/2016
52. International Chinese Statistical Association Applied Statistics Symposium, Atlanta, GA. 06/2016
53. International Chinese Statistical Association/Korean International Statistical Society Joint Applied Statistics Symposium, Portland, OR. 06/2014
